SENIOR FULL STACK ENGINEER
React | TypeScript | Next.js | Node.js | PostgreSQL | AWS

SUMMARY
Senior Full Stack Engineer with 7+ years of experience building production-critical web applications across fintech, insurance, and education. Owns architecture and delivery for customer-facing systems using React/Next.js, TypeScript, Node.js, and PostgreSQL. Specializes in real-time and high-volume workflows where reliability, maintainability, and release quality are essential. Delivers end-to-end systems that ship reliably and scale with product demand.

KEY HIGHLIGHTS
- Own frontend architecture and delivery for a production-critical real-time trading platform in a lean fintech team.
- Deliver full-stack fintech and payments systems across React/Node.js architectures.
- Design production-critical UI and API workflows that improve reliability and reduce complexity.
- Build reusable component systems and testing practices that increase delivery speed.

CORE SKILLS
Frontend: React, TypeScript, Next.js, Redux, Angular (17/14+), AngularJS, HTML/CSS, Tailwind, SASS
Backend: Node.js, REST APIs, GraphQL, Rust (working), C#
Data: PostgreSQL, MySQL, Snowflake, SQL query authoring
Testing: Cypress, Jest, React Testing Library, Jasmine, Cucumber
Cloud/DevOps: AWS (EC2, Lambda), Azure, Docker, GitHub Actions CI/CD, Splunk

EXPERIENCE

Open Yield Inc. | Senior Full Stack Developer (Frontend Architecture Owner) | May 2025 to Present | New York, NY
- Own frontend architecture and delivery for a production-critical real-time trading platform in a 4-engineer fintech team, defining standards and implementation direction.
- Architect and ship data-intensive React/Next.js features that support live pricing and order-entry workflows.
- Implement event-stream update handling for live pricing tables, improving UI reliability and real-time data accuracy.
- Deliver order-entry refactors and Sweep the Order Book interactions, supporting faster execution workflows for traders.
- Implement Rust-backed endpoints and SQL query optimizations supporting pricing and order management workflows.
- Deliver RBAC and a reusable component library, improving security controls and enabling faster, more consistent UI delivery.

Atlantic Casualty Insurance | Senior Software Engineer | Jul 2024 to May 2025 | Charlotte, NC
- Owned delivery of frontend and platform enhancements for production insurance systems supporting quoting and policy issuance workflows.
- Delivered Angular 17/AngularJS and C#/VB6 improvements that increased maintainability across customer-facing and internal operations flows.
- Drove Cypress and Jest adoption, improving regression prevention and release reliability.
- Implemented Gitflow and delivery process improvements, reducing rework and improving team throughput.

The Bank of London | Full Stack Developer | Nov 2021 to May 2024 | Charlotte, NC

- Owned end-to-end delivery of customer-facing onboarding and payments workflows in a production fintech platform.
- Delivered React/TypeScript frontend systems and Node.js APIs supporting payment-processing flows across UK banking integrations.
- Maintained CI/CD pipelines for biweekly Docker deployments in AWS, improving release predictability and operational stability.
- Expanded automated coverage with React Testing Library and Cypress, reducing production risk for critical customer journeys.
- Delivered shared UI component patterns that improved cross-product consistency and reduced repeated implementation effort.

Discovery Education | Full Stack Developer | Aug 2020 to Nov 2021 | Charlotte, NC
- Owned delivery of reporting and anomaly-detection workflows in a customer-facing education platform.
- Delivered Angular/TypeScript interfaces and C#/PostgreSQL APIs that improved operational visibility and issue resolution workflows.
- Designed and delivered a Snowflake warehouse that reduced manual reporting effort and improved analytics readiness.

Vanguard | Full Stack Developer (I-II) | Aug 2018 to Sep 2020 | Charlotte, NC
- Delivered production financial platform features with Angular/TypeScript in a TDD-based engineering environment.
- Implemented Express.js and NestJS services with Splunk observability, improving service reliability and production troubleshooting.

Ally Financial | Systems Engineer (Contract) | Jan 2018 to Sep 2018 | Charlotte, NC
- Delivered ServiceNow CMDB integrations and data-quality tooling through REST-based enterprise integrations.

Novant Health | Systems Analyst/Programmer Associate | Jul 2016 to Jan 2018 | Indian Land, SC
- Delivered ServiceNow Service Portal customizations during platform upgrades using AngularJS, JavaScript, HTML/CSS, and SOAP/XML.

EDUCATION
UNC Charlotte
B.A. Computer Science (Software Engineering), Minor in Technical Writing

CERTIFICATIONS
ServiceNow Certified System Administrator
ITIL Foundations
